FLAT STANDARD GUTTER GUARD

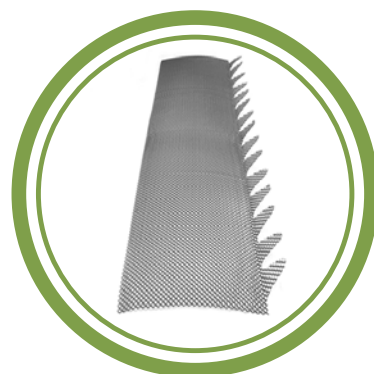

Flat Leaf Guard can be used on the valleys of a corrugated roof as well as flat roofs (pergolas, patios and awnings). Each piece is a 1200mm length at a standard width of 200mm.

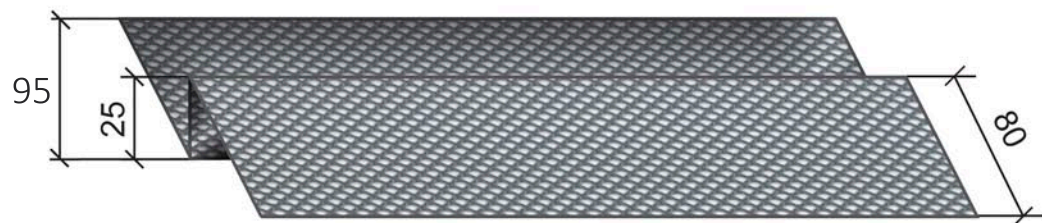

CORRUGATED GUTTER GUARD

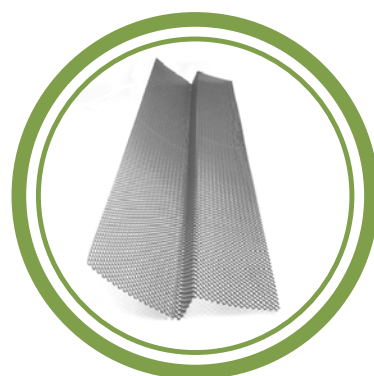

The Signature Product of Corrugated Gutter Guard. Standard Width of 200mm. Caters for all corrugated roof and gutter combinations. Also Available in reverse format for high pitch situations or for more efficient capture of rainwater.

TILE ROOF GUTTER GUARD

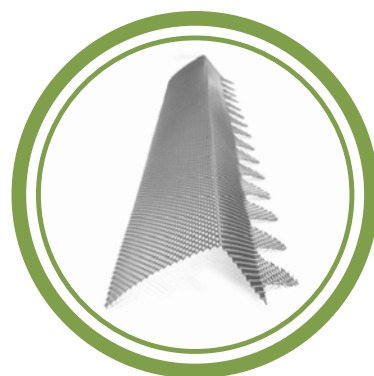

The Leading solution for a standard Tile Roof. Product sits on top of the gutter or is fitted into the lip. Folded to suit tile and goes under the first row of tiles blocking all access to under the roofline. Neat, Aesthetic and Highly recommended for high wind areas. Product comes folded at a standard 25mm Step Fold.

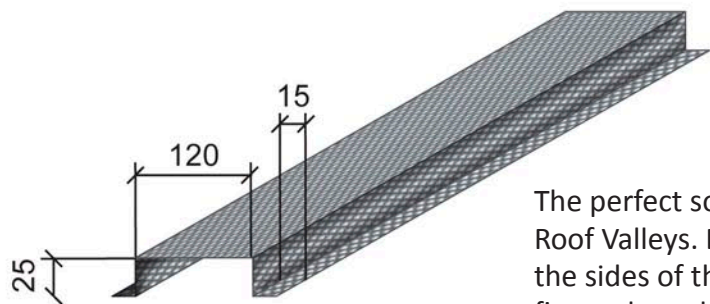

BULLNOSE GUTTER GUARD

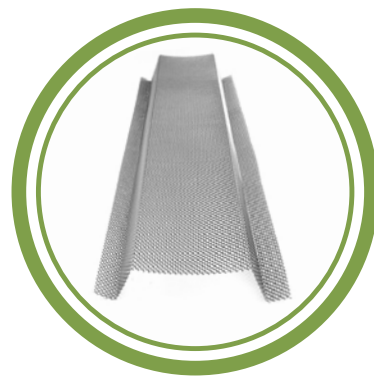

The perfect solution for guttering on bullnose roofs. Also available in reverse format for a more efficient capture of rainwater. Product comes precut to suit corrugated profile.

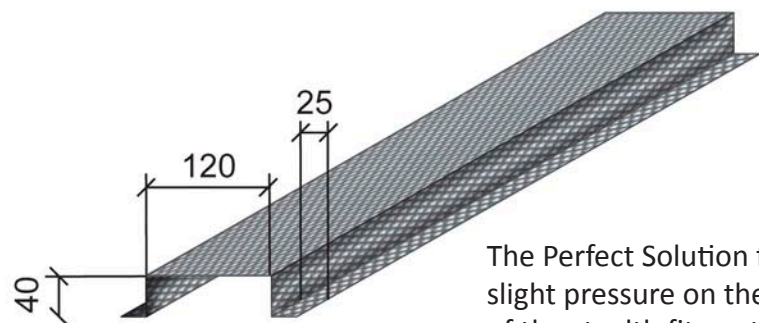

STEALTH VALLEY METAL ROOF GUTTER GUARD

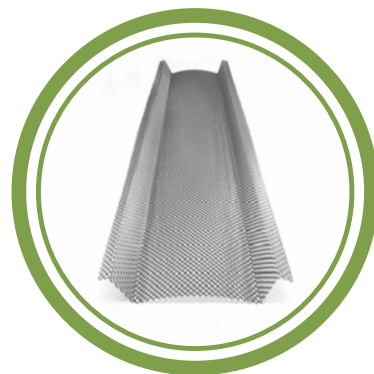

The perfect solution for screw-less Metal Roof Valleys. By applying slight pressure on the sides of the fold, the wings of the stealth fit neatly under the valley roofline. Product comes folded to suit valley.

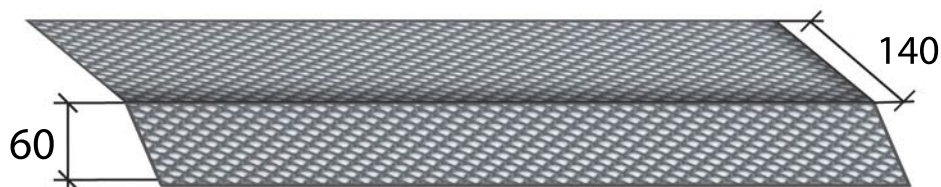

STEALTH VALLEY TILE ROOF GUTTER GUARD

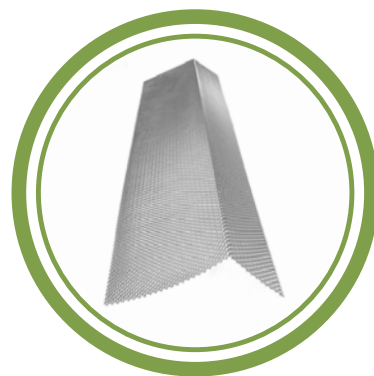

The Perfect Solution for Tile Valleys. By Applying a slight pressure on the sides of the fold, the wings of the stealth fit neatly under the valley roofline.

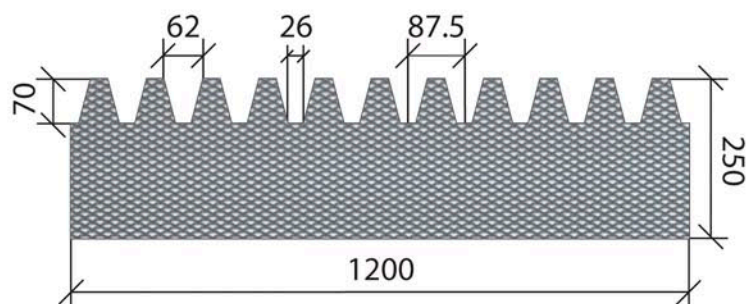

150 HALF ROUND GUTTER GUARD

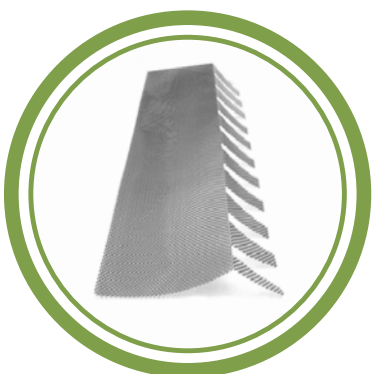

The leading solution for a quick and easy installation. Manufactured to suit 150 Half round gutters. Product tucks underneath the roof and slips into the lip of the gutter.

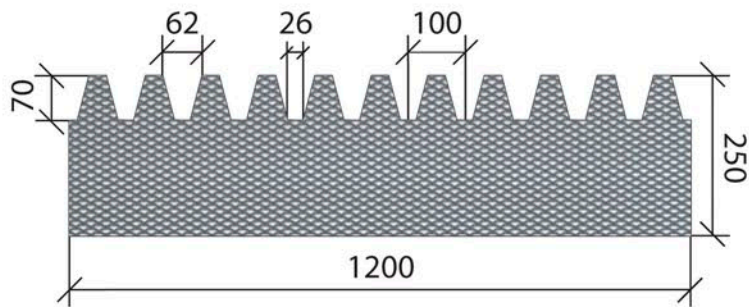

METAL ROOF GUTTER GUARD (87.5 CENTRES)

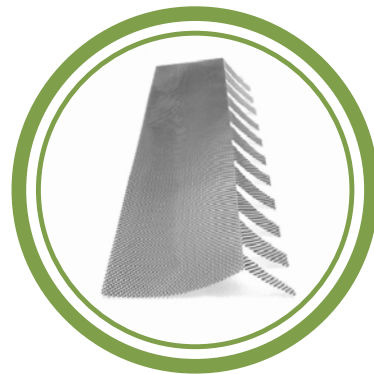

Product is precut and designed to suit: Varying roof profiles. Suits Metroll MetroSpan® and Stratco Smartspan®.
